DGM QC Frequency and Acceptance Criteria

Test	Acceptance Criteria	Frequency of Testing			
		Start of Day	Start & End of Day	First Day of Project Only	Equipment Change
Equipment Warm-up	Equipment Specific - typically 5 minutes	X			
Record Sensor Position	+/- 1 inch	X			X
Personnel Test	EM: 2 mV p-p Mag: 1 nT p-p	X			X
Vibration Test (Cable Shake)	Data spiking not evident in profile	X			X
Static Background Test	EM: 2.5 mV p-p Mag: 1 nT p-p		X		X
Static Spike Test	+/- 20% of standard response after background correction		X		X
Azimuthal Test (magnetics only)	Sensor orientation minimizes drop outs			X	
Height Optimization (magnetics only)	Maximum signal/noise ratio that reliably detects smallest target objective			X	
6 Line Test	Repeatability of response amplitude +/- 20%, Positional accuracy +/- .5 foot			X	X
Octant Test (magnetics only)	Document heading error for post-processing correction			X	X
2 Line Repeat Data	Repeatability of response amplitude +/- 20%, Positional accuracy +/- .5 foot		X
