

Site 39 Inland Ranges Habitat Restoration Status Update

May 9, 2016

Plant Propagation for 2016/2017 Restoration Season

- Plant target = 8,631
 - On track to hit all hard-to-grow plant targets
 - One exception – Coast silk tassel (*Garrya elliptica*)
 - Began propagation of common plants and will continue through summer

Spring Monitoring

- Completed HMP forbs density surveys (Years 1-5, and 8 at appropriate HAs)
- Anticipate completion of species richness surveys for all HAs by 5/12
 - All HMP forbs found during surveys are mapped and assigned a density class
- Anticipate completion of all photo points for all HAs by 5/12
- Preparing for vegetation cover surveys (at all HAs)
 - Anticipate 5/16 start date

Seed Collection

- Began seed collection 5/4 for nodding needle grass (*Nassella cernua*)
