

Site 39 Inland Ranges Habitat Restoration Status Update

November 8, 2016

Plant Propagation

- On track to hit 2016 plant targets: 8,631 plants (4.37 acres worth of plants for HAs 34 and 37)

Seed Collection

- Completed 2016 seed collection targets
- Collected 43 lbs of seed for HA 19 (14 species)

Seed Broadcast

- Seeded four test plots to monitor how seed germinates in erosion control areas that have a mulch application
- Preparing seed mixes and planning to broadcast 8 acres of area with seed in Nov/Dec
 - 4 acres of area at HA 19 with collected seed
 - 4 acres of area at multiple HAs with production seed

Erosion Control Repairs

- Completed "dry season" erosion control repairs HAs 27A, 28, 34 and 37
 - Installed 80 straw rolls and 2,000 SF of coir fabric
- Monitoring sites for "wet season" repairs

Plant Survivorship Monitoring

- Completed plant survivorship monitoring at HAs 18, 28, 34, 37 and 38
